Senior Consultant Renrick Tulloch brings over ten years of corporate IT experience to your doorstep. A Certified Lotus Notes Professional (CLP™), IBM Certified Solutions Expert in Net.Commerce and IBM Certified Solutions Expert in Firewalls, Mr. Tulloch has lent his considerable skills to IBM Global Services, GE Capital Consulting and the U.S. Environmental Protection Agency. In addition to helping small business owners thrive in the high-tech world, he devotes his free time to the study of sound/light vibration and its effects on plant and human life.

GET YOURSELF CONNECTED

Run your small business as a high-tech office but on a low-tech budget.

Propel your business forward with networked technology. Centralize operations by connecting all your business machines — whether you have three desktops in your basement office or thirty laptops out in the field.

MyStar Consulting works closely with you to assess your present and future networking needs. We provide a cost analysis and construction timeline for your approval, set up your network and provide administrative support to bring your business to the next level.

Are you ready to connect?

NETWORK ADVANTAGE

No more documents transferred on floppy disks. With a company network, you cut down on lost files, lost time and lost business. You save money and space with fewer printers and other office machines. Team members share the files you designate. Key personnel access sensitive files through passwords or by network design.

MyStar Consulting also sets your network up, wired or wireless, with encryption and firewall security so you can conduct your business with increased peace of mind.

HIGH-FLYING WIRELESS

Surf the Internet in your favorite coffee shop. Print files across the room while you relax on the sofa. Pay e-bills from your back porch. Wireless technology frees you from the bondage of cables and allows your business to soar.

TECHNICAL SUCCESS

You've worked hard to make your business a

success. You can't risk

losing your data in a system-wide crash. MyStar helps you design your network and choose high-quality equipment that can accommodate your company's growth through the years. From battery backups to wireless laptops, MyStar helps you furnish your office for productivity and prosperity.

Devote your energy to expanding your business. Let MyStar Consulting take care of the digital details.
